Cable: cable 50" (127cm), cable 64" (163cm)

Case: small square round

Name on Case (if different from First Name and Name):

Getting Good Ear Impressions

Precise fit is a must when it comes to enjoying your Ultimate Ears™.

They should deliver excellent sound quality and offer the best possible hearing protection. Most importantly your Ultimate Ears™ should fit securely in your ears and be comfortable during use.

In order for us to craft your pair of Ultimate Ears™, we will need to have a pair of your ear impressions.

Listed below are step-by-step instructions for having your ear impressions made and the correct address for you to ship to.

A local hearing aid centre or audiologist will be able to perform this service for you.

1. The easiest way to find a local hearing aid centre or audiologist in your area is through the yellow pages.
2. Depending on where you live you may pay as little as EUR 15 for impressions. In our opinion you should never need to pay more than EUR 35.
3. It is very important that your ear impressions are made with a high quality silicone material.
4. It is VERY IMPORTANT to have an "open mouth impression" taken to the second bend of the ear canal. This is accomplished by doing the following:

A. OPEN MOUTH WIDE WHEN IMPRESSION MATERIAL IS BEING INJECTED

B. DO NOT CLOSE MOUTH UNTIL THE IMPRESSION MATERIAL HAS COMPLETELY CURED.

We recommend using a bite block to assure there is no jaw movement while the impressions material is curing.

You will leave the appointment with your impressions. They should be given to you in a box that will protect them during shipping. Be sure that your first and last name is on the box containing your impressions.

Send impressions to:
